

Why Come to PEI?

PEI has been manufacturing collectibles for over 40 years, and has one of the largest plants in the world. All of our products are manufactured in the U.S. We stand behind our products and our services, and have the knowledge and expertise to make your products and programs successful. Here are just a few of the things you can expect when you deal with PEI:

Expert design capabilities

Our product design team has over 85 years of combined experience creating keepsakes and decorative products. They will take your ideas and translate them into a solid, beautiful piece.

Fast service

PEI's metal etching processes uses special tools that are all made in-house, so your initial design and any minor design changes can be made quickly and easily. Because the tooling is so inexpensive, pieces can be made in relatively small quantities. And our large inventory of in-house materials can reduce your leadtimes considerably.

Consistency

The quality of your product will be the same, whether it's the first off the line or the 100,000.th, since phototools don't "wear" like other kinds of tools or forms.

Satisfaction

PEI has a long history of customer satisfaction. PEI's plating and finishing standards meet or exceed the standards of the U.S. Department of Commerce and national and international jeweler associations.

Cost-effective fulfillment

Regardless of whether or not PEI does your fulfillment, orders are inexpensive to ship. Etched ornaments, bookmarks, and other products are lightweight yet durable.

Please note that all pictured ornaments, packaging, and literature are the property of the individual client and are not available for sale or distribution through PEI. All pictured items are shown to illustrate capability only.
